Experience

Nudgity Labs

Software Development Engineer II

May 2026 – Present

Delhi

- Own frontend and mobile application development using React and React Native, driving features from implementation through production.
- Built and delivered an end-to-end notification system covering frontend integration, notification handling, user flows, and production release.
- Upgraded the mobile application from Expo SDK 50 to Expo SDK 57, resolving compatibility issues and ensuring application stability across the migration.
- Integrated Firebase Crashlytics, Firebase Analytics, and Amplitude for crash monitoring, product analytics, and user behavior tracking.
- Designed database architecture and schemas from scratch using Drizzle ORM and integrated application data flows with backend services.

Predictive Data Sciences

Mobile App Consultant

Feb 2026 – Apr 2026

Remote

- Contributed to React Native mobile application development, feature implementation, debugging, and application improvements.
- Collaborated with engineering and product teams to deliver mobile features and improve application stability and user experience.

HPS Lab Designs (AJJAS)

Senior Software Engineer (SDE II)

Dec 2021 – Feb 2026

Bhopal, Madhya Pradesh

- Led end-to-end development of cross-platform mobile and frontend features serving 50K+ active users using React, React Native, and native Android.
- Built core modules including navigation, geofencing, dashboards, and real-time monitoring across 3+ products.
- Designed scalable application architecture and reusable components; developed native Java/Kotlin modules and optimized React Native bridges.
- Architected BFF services and REST APIs handling 1M+ requests/month and improved performance, reducing crashes and latency by 30%+.
- Led production releases, integrated Razorpay payments, resolved critical issues with under 2-hour turnaround, and mentored junior developers.

Ascian Solutions

Android Development Intern

Sept 2021 – Dec 2021

New Delhi

- Built and optimized an Android book lending application, improving performance by 25% and achieving a 98% crash-free release.

Projects

Online Cabo – Multiplayer Card Game | React, Python, MongoDB, Socket.IO

- Built and deployed a real-time multiplayer card game with room-based gameplay, turn management, scoring, and rematch support.
- Developed the frontend and integrated a Python backend with MongoDB and Socket.IO for persistent game state and real-time communication.
- Designed a responsive mobile-first PWA experience and deployed the application with a custom domain.

Portfolio Website | Next.js, React, Tailwind CSS

- Developed a responsive portfolio with reusable interactive components and optimized page performance.

Education

Technocrats Institute of Technology

Bachelor of Technology in Computer Science

2019 – 2023

GPA: 9.29 / 10.00

Technical Skills

Languages: JavaScript, TypeScript, Java, Kotlin, C++, Python, HTML, CSS

Frameworks: React, React Native, Next.js, Node.js, Express.js, Tailwind CSS, Expo

Mobile: Android SDK, Expo, Native Modules, iOS Integration, MVVM, Play Store Deployment

Backend & Data: REST APIs, BFF, MongoDB, Drizzle ORM, Socket.IO, Database Design

Tools & Analytics: Firebase Crashlytics, Firebase Analytics, Amplitude, Git, GitHub
